

Detailed Table of Contents

Chapter 1 Classification	13
Migraine.....	13
Trigeminal Autonomic Cephalalgias	15
Tension-Type Headache.....	16
Conclusion	17
Chapter 2 Diagnosis	19
History.....	19
Types of Headache.....	19
Onset.....	22
Frequency	22
Site	22
Duration.....	23
Severity and Character	23
Migraine Phases and Prodromata	23
Associated Symptoms.....	24
Precipitating Factors.....	24
Sleep Pattern	25
Emotional Factors.....	26
Family History.....	26
Medical, Surgical, and/or Obstetric History.....	26
Allergies	26
Previous Medications and Therapies.....	26
Current Medications.....	26
Physical, Neurologic, and Diagnostic Workup.....	27
Physical Workup.....	27
Neuroimaging.....	29
Lumbar Puncture.....	32
Electroencephalogram.....	33
Other Diagnostic Tests.....	33
Chapter 3 Migraine Headaches	35
Diagnosis and Classification	41
Clinical Features	43
Treatment.....	51
General Treatment Measures.....	51
Acute Therapy.....	54
Gepants.....	83
Ditans.....	86
Other Agents	87
Pain Relief.....	90
Aspirin, Acetaminophen, and Caffeine.....	90
NSAIDs/COX ₂ Inhibitors	91
Narcotic Analgesics	91
Antiemetics.....	92
Transanal Butorphanol.....	92
Cold Packs.....	92
Prophylactic Therapy.....	93
β-Blockers.....	93
Anticonvulsants	96
Angiotensin II-Receptor Blocker.....	99
Calcium Channel Blockers.....	99
Antidepressants.....	100
Anti-CGRP Agents.....	101
Botulinum toxin	108
NSAIDs/COX ₂ Inhibitors	108
Cyproheptadine	109
Biofeedback.....	109
Neurostimulation	111
Chapter 4 Trigeminal Autonomic Cephalalgias	119
Cluster Headache	119
Cluster Headache: Acute Treatment Options.....	123
Cluster Headache: Prophylactic Therapy.....	127
Verapamil	131
Lithium Carbonate	131
Galcanezumab	131
Other Pharmacological Treatment Options.....	132
Non-pharmacological Treatment Options.....	132
Histamine Desensitization	133
Surgical Intervention	134
Other Forms of TACs.....	134
Chapter 5 Tension-Type Headaches/Coexisting Migraine and Tension-Type Headaches	143
Tension-Type Headaches	143
Treatment	150
Coexisting Migraine and Tension-Type Headaches (Transformed Migraine, Chronic TTH, Mixed Headache)	156
Treatment	157
Medication Overuse Headache	159
Chapter 6 Secondary Headache Due to Organic Causes	165
Headaches Due to Space-Occupying Lesions	166
Tumor	167
Hematomas	170
Subarachnoid Hemorrhage.....	172
Brain Abscess.....	173
Arteriovenous Malformations	175
Infections.....	175
Low Cerebrospinal Fluid-Pressure Headache	177
Chronic or Marked Increases in Intracranial Pressure.....	177

Cranial Arteritis.....	179
Major Neuralgias.....	182
Temporomandibular Joint Disorder.....	189
Chapter 7 Special Patient Considerations.....	191
Headaches in Children.....	191
Headaches in the Elderly.....	200
Chapter 8 Headaches in Women.....	209
Menstrual Headaches.....	210
Premenstrual Headaches.....	210
Pregnancy.....	211
Lactation.....	211
Menopause.....	213
Hormone-Replacement Therapy.....	213
Oral Contraceptives.....	213
Treatment.....	214
Menstrual Migraine.....	214
Premenstrual Syndrome Headaches.....	217
Pregnancy.....	217
Lactation.....	219
Menopause.....	219
Oral Contraceptives.....	220
Chapter 9 Post-traumatic Headache.....	223
Chapter 10 Emergency Treatment of Headache.....	237

FOREWORD

I am honored to present the eighth edition of *Clinical Management of Headaches*. In this new and revised edition, I maintain the original purpose of this text: to provide current information and practical solutions to the management of headache problems.

I hope that my long-term clinical experience is reflected in this handbook, and that readers will find it an informative and helpful reference. The book has remained accessible to physicians confronted with patients with headache, and has not become voluminous in content.

The treatment options for headache have expanded considerably since the publication of the first edition in 1994. With each edition, new agents and newer methods of administration have been reviewed, and tables updated. This edition is no exception, and I strive to provide the most up-to-date information available to the clinician.

Merle L. Diamond, MD
