

Detailed Table of Contents

1. Definition and Classification	9
Introduction	9
Altered Demographics	10
New and Resistant Pathogens.....	11
Economic Pressure	11
Diagnostic Confusion	11
Historical Perspective.....	12
CAP	12
Symptoms and Signs.....	14
Nonclassic Symptoms/Clinical Signs in Elderly CAP Patients...14	
Chest Radiographs.....	14
HCAP, HAP, and VAP	16
Summary	18
2. Pulmonary Host Defenses	23
Host Defenses.....	23
Mechanical Barriers	23
Cellular Components.....	25
Inflammatory and Molecular Host Defenses	26
Humoral Defenses	28
Pulmonary Microbiome.....	29
Airway Colonization and Bacterial Adherence.....	31
3. Diagnosis of Pneumonia	39
Typical Pneumonia	40
Atypical Pneumonia.....	41
Chest Imaging	44
Blood Tests: Blood Counts and Chemistry.....	46
Oxygenation Status.....	48
Molecular Tests: Multiplex PCR	48
Blood and Plural Fluid.....	50
Serology.....	51
Bronchoscopy and Related Procedures	51
Hospitalization	52
4. Community-Acquired Pneumonia	57
Epidemiology.....	57
Management.....	62
Specific Types of Pneumonia.....	69
Legionnaires' Disease	72
Other Atypical Pneumonias	73
Therapy	88
5. Antimicrobials Used to Treat Pneumonia	99
β -Lactams.....	100
Penicillins	100
Aminopenicillins.....	102
Piperacillin/Tazobactam.....	106
Ampicillin/Sulbactam	107
Sulbactam/Durlobactam	108
Cephalosporins	109
Cefuroxime Axetil.....	1120
Cefetamet Pivoxil.....	113
Cefpodoxime Proxetil	114
Ceftibuten	114
Loracarbef.....	115
Cefprozil.....	116
Ceftriaxone	116
Ceftazidime	117
Ceftazidime/Avibactam.....	118
Cefepime	120
Ceftaroline.....	121
Ceftolazane/Tazobactam	123
Cefiderocol	124
Ceftobiprole	125
Imipenem/Cilastatin.....	127
Imipenem/Cilastin/Relebactam.....	128
Meropenem	131
Meropenem/Vaborbactam	130
Doripenem	131
Macrolides	132
Clarithromycin	133
Azithromycin.....	134
Roxithromycin.....	138
Dirithromycin.....	139
Fluoroquinolones.....	140
Ciprofloxacin	140
Levofloxacin.....	147
Moxifloxacin.....	148
Gemifloxacin	149
Delafloxacin.....	151
Tetracycline Class Antibiotics.....	152
Tigecycline.....	152
Omadacycline.....	153
Oxazolidinones	154
Linezolid.....	154
Pleuromutilin Class Antibiotics.....	157
Lefamulin	157
6. Hospital-Acquired Pneumonia	163
Epidemiology.....	163
Risk Factors and Pathogenesis.....	164
Approach to Diagnosis.....	168
7. Management of Hospital-Acquired Pneumonia and Health Care-Associated Pneumonia	177
Therapeutic Options	183
Monotherapy vs Multidrug Therapy	184
Problems With Drug-Resistant Organisms	187
MRSA	187
Multidrug-Resistant Gram-Negative Rods	189
Patients With Specific Risk Factors With Onset During Hospitalization	190

Patients with Severe HAP (Early Onset With Specific Risk Factors or Late Onset).....	193	13. Bronchitis	289
8. Switch Therapy, Step-Down Therapy, and Prevention	197	Acute Bronchitis.....	2989
Timeliness of Antibiotic Therapy.....	197	Etiology.....	290
Definitions.....	198	Pathogenesis.....	200
Factors That Influence Antimicrobial Therapy.....	199	Clinical Presentation.....	291
Patient Factors.....	199	Diagnosis.....	291
Pathogen Characteristics.....	200	Treatment.....	292
Antibiotic Properties.....	200	Acute Exacerbations of COPD.....	293
Approach to Switch Therapy.....	201	Role of Bacterial Infection.....	294
Antibiotic Principles.....	205	Bacterial Pathogens.....	297
Duration of Therapy.....	206	Pathogenesis of Bronchial Infections.....	299
Prevention of CAP.....	207	Risk Stratification.....	300
Improving the Process of Care.....	209	Nonantimicrobial Treatment.....	304
Summary.....	213	14. Abbreviations/Acronyms	311
9. Natural History of Pneumonia	217		
Introduction.....	217		
Pathophysiology.....	218		
Comorbidities and Resolution of CAP.....	219		
Age and Resolution of CAP.....	220		
Severity and Resolution of CAP.....	220		
Infectious Agents and Resolution of CAP.....	221		
Pneumonia of Unknown Etiology.....	226		
10. Possible Etiologies of Nonresolving Pneumonia	231		
Infectious Etiologies.....	231		
Pathogen Factors.....	231		
Host Factors.....	239		
Therapy-Related Factors.....	241		
Noninfectious Etiologies.....	243		
Neoplastic.....	243		
Immunologic Diseases.....	245		
Drug-Induced Pneumonitis.....	253		
Pulmonary Vascular Disease.....	257		
11. Approach to Nonresolving Pneumonia	263		
Imaging Tools.....	263		
Bronchoscopy.....	265		
Open-Lung Biopsy.....	267		
Summary.....	267		
12. Parapneumonic Effusions and Empyema	271		
Pathogenesis.....	271		
Uncomplicated or Simple Parapneumonic Effusion.....	273		
Complicated Parapneumonic Effusions.....	273		
Empyema.....	273		
Imaging of Pleural Effusions.....	274		
Pleural Fluid Analysis.....	278		
Assessing the Risk for Complicated Effusions.....	281		
Interventions.....	283		
Pleural Fluid Drainage.....	283		
Intrapleural Fibrinolytics.....	285		
Surgery.....	285		
Summary.....	286
